

The NLG are proud of the quality services provided and we believe that one of the core requirements is a well-trained and highly motivated workforce. All group companies participate in the Textile Services Association accredited training scheme.

In addition we have a robust Capital Investment Programme to ensure that all of the laundries are well equipped to deliver exceptional quality across all of the sectors who rely on us to assist them in the smooth running of their businesses.

We also play our part in protecting the environment and have a number of initiatives to reduce our carbon footprint by ensuring that we, for example, re cycle water and reduce waste by capturing the heat from waste water and re-using this in the laundry process.

All of our suppliers are closely vetted to ensure that, since a large percentage of the linen used is sourced from overseas, they have in place a robust ethical sourcing policy.
